Haverstraw Bay is the widest, most shallow section of the Hudson River. With almost 18 square miles of water it constitutes an enormous watershed – with iconic hills, smokestacks, headlands and other features. Its history, natural beauty and sunsets are treasures to our area.

Local historian **Scott Craven** has two degrees in American History and lectures extensively about the Hudson River Valley. He will discuss the various features of Haverstraw Bay and explain what they are and why they are important. Please join us for this free event.
